Arbitron Radio Station Relations  
9705 Patuxent Woods Drive  
Columbia, MD 21046-1572

May 2, 2002

Please be advised that I have learned that Cool 105.5 WCOO-FM Charleston, South Carolina has been operating at less than 50% power for over three weeks, and at last test has been running at 35% of power for the last week. This is severely affecting our broadcast range and I sincerely hope Arbitron will take this into consideration for the spring rating period for the Charleston market.

Today we have received reports that 105.7 has been breaking in to our signal not less than 8 miles away from the station's location and less than 20 miles from the transmitter location.

I have been assured that a tube replacement will be installed today to solve this problem and I will advise Arbitron the moment I am aware the replacement has brought us back to full power. We are currently transmitting on the backup transmitter.

In hopes you will feel compassion for a struggling programmer....

Sincerely  

Lee Kent  
Program Director  
WCOO-FM Cool 105.5  
Charleston, SC.
