Message:

Bill;

The attached email messages have been sent to me from Bruce Musso including two attempts, the latest moments ago from aol to infect my machine with a worm virus. Management has been asked to put a stop to this but has not done so apparently out of fear that Musso would shut off the transmitters as he alone has the codes here to turn them off and on. I consider this to be harassment condoned by management as no action has been taken after repeated notifications to put a stop to it. I have filed numerous times to remove Musso's email account but it still continues. I expect something will be done to put a stop to this. I am tired of being bullied in an attempt to get me to leave this station when I'm the only one here working for the owner. Today's emails from Musso are following Linda's being up set yesterday that she had to change the way she was doing remotes and then claimed Bobby Collins attacked a promo I made. Bobby says Linda was the attacker of the promo. (I believe Bobby as he's shown to be a concerned employee). Each time Linda is upset it is followed by an intimidation letter from Musso.

How long is this going to be permitted?

Lee
